

## Environmental policy

**Nordifa develops, manufactures and sells products for environmental engineering applications and therefore it is a matter of course for us to keep on a high level with our own environmental work.**

- Nordifa upholds an environmental method for the whole organisation. The criteria of the international environmental standard, ISO 14001, shall be a minimum demand in our work. The environment method is systematically evaluated to correspond to the customers' and the authorities' demands.
- The whole staff is following current routines and instructions of the environmental method and is encouraged to take a personal responsibility by having required education.
- Nordifa endeavours to use production equipment, form of energy and distribution by considering the lowest possible environmental strain.
- Economizing and recycling of raw material is constantly being supervised and improved. Products which cannot be recycled in our own or in partners' production is used for energy recycling.
- To secure and limit as much as possible the effect of unintentional dumping there are contingency plans, worked out in cooperation with the authorities.
- Nordifa's products, packing and raw material shall continuously be judged in order to diminish the negative influence on health and environment.
- Nordifa demands for and cooperate with suppliers and other partners to jointly always pay better attention to show respect to the environment.

Nordifa AB

A handwritten signature in black ink that reads "Robert Bornefalk". The signature is written in a cursive style. To the right of the signature is a vertical red line.
